**Note: For the stock selection returns will be calculated from the closing price on 1/7/10 through the close on 12/31/10. We will assume time weighted total returns with dividend reinvestment in the security. If a company is acquired for stock during the year, we assume that it is reinvested in the new company for the remainder of the year. Will use ending number on 12/31/10 for DJIA, 10 year Treasury yield, and Crude Oil Price. Penny stocks (below \$5.00/share) and shorting stock pick not permitted. The tiebreaker for best Stock Selection will be the closest DJIA prediction.**
